

Dunkermotoren is exhibitor at the virtual.Compamed 2020

The Compamed trade fair will also take place this year as a virtual event from 16 - 19 November, 2020. Dunkermotoren is listed as an exhibitor again this year and will present its comprehensive product portfolio for the medical technology market.

From brushed and brushless motors to linear systems, consistently modular as a suitable drive solution with gearboxes, brakes, encoders or also with integrated or external electronics. This enables the company to offer its customers the possibility to obtain a complete drive system from a single source, thus providing maximum flexibility.

Dunkermotoren offers the right motor solution for diagnostics, laboratory, rehabilitation and therapy, patient care and imaging analysis. The drive solutions are characterized by long service life and cycle numbers, zero-error tolerance, high resolution and good controllability and low noise.

New on the market is the PLG 22, which is the smallest gearbox in the Dunkermotoren portfolio. It is optimally matched to the ironless BLDC motor BGA 22, which operates according to the axial flow principle, not only in diameter but also in terms of torque. To increase the robustness of the planetary gearbox, the gearbox is made of metal. The low noise level is astonishing. Dimensioned on the outer diameter, the PLG 22 can transmit a high torque of up to 3.5 Nm.
