

PRESS RELEASE

of Dunkermotoren GmbH in July 2020

Dunkermotoren's website shines in new splendor

After a first complete overhaul of the Dunkermotoren website in 2016, it shines in a new design now. The facelift concentrated primarily on adapting to current trends and designs. For example, the function of parallax when scrolling on the page was integrated. The new full-screen design allows an optimal presentation of the website depending on the screen size. This makes configuring motor solutions in the online configurator even more convenient than before. The integration of moving images offers the website visitor a new experience of our applications. The biggest adaptation of the website is probably the career area, which has been completely redesigned in terms of content. In testimonials, employees report on their experiences as employees at Dunkermotoren. Overall, the layout is characterized by a new visual language compared to the previous version, which presents the company in a contemporary way.
