

PRESS RELEASE

of Dunkermotoren GmbH in July 2020

New express production enables even shorter delivery times for small requirements

Dunkermotoren offers a comprehensive modular system of modularly combinable drive solutions consisting of motors, gearboxes, brakes, encoders and controllers. A selection of approximately 1000 combinations can be generated from components of the stock program.

The assembly of the complete solutions will soon no longer take place in series production, but in unchanged quality in a new separate express production facility. This means that Dunkermotoren can offer its customers delivery times of 3 days for solo motors and 10 days for complete drives from its stock program. The delivery time is valid for orders up to a maximum of 10 pieces and is without extra charge.

Customers can find an overview of the approx. 1000 variants defined as stock program in the online configurator at <https://www.dunkermotoren.com/stock-program>

Independently of the new express production, Dunkermotoren continues to offer sampling for OEM projects from its own sample production. The production is usually within 2 weeks, this also applies to many customer-specific special designs.
