

EGS Automation is exhibitor at the AMB in Stuttgart

EGS Automation, robotics specialist from Donaueschingen will exhibit together with Dunkermotoren | nexofox - belonging to the American group AMETEK Advanced Motion Solutions - at the AMB trade fair in Stuttgart from September 13 to 17, 2022.

In **Hall 6** at **Booth 6B45**, the two companies will present their joint strength. The cooperation between EGS Automation and Dunkermotoren will be demonstrated on a real machine. EGS Automation presents a SUMO Duplex with a Yaskawa GP 7 robot. The robot cell can be used in a wide variety of applications, e.g. for loading machines and processes of all kinds. At the show, the SUMO Duplex will be used to automatically load a joining process - specifically, joining a shaft to a gear. Dunkermotoren is operating as a customer of EGS Automation in this case. The demonstrated manufacturing cell will produce live parts at the show and will be used in production after the show. For sure, the machine also includes motors from Dunkermotoren - the smart brushless DC motor BG 95x80 **dPro** with integrated PROFINET interface is used at the joining device. A BG 45x30 MI is used in the feed system for the shafts.

The cooperation between EGS Automation and Dunkermotoren does not end at the physical component level but goes far beyond. The close link is particularly evident in the development of IIoT solutions, which come together under the IIoT brand nexofox. EGS Automation will present a production plant digitized by nexofox at its booth. The focus here is on the tools and services from nexofox, which are offered to customer from EGS Automation in the future. Simple and smart integration.
